Double Head News.

Crops of this section are doing very well, especially the grass.

The health of the people here is generally very good, though Miss Mattie Grimes is quite ill at present. We hope she will be well pretty soon.

Miss Nettie Peacock and Mr. Cyrus Ross spent Sunday at the home of Miss Grimes.

Miss Nettie Peacock is teaching music in Troy this week.

Our regular meeting was held at Hobson church Sunday. We had a good crowd and good preaching.

Our singing will commence at Double head school house the 4th Sunday evening. Everybody come.

The young people are having a glorious time going to musicals and ice cream suppers and other to-dos.

Sunday School is fine down at the Perdue place of business.

Mr. Editor please pray for the grass not to grow so fast. Grace

BROCKTON, ROUTE 2.

BY HUSTLER.

Rain has got to be most plentiful hereabouts, and the frequent showers will no doubt soon cause grass to be giving farmers a real hot time."

Getting to be real Williamson weather—corn and hay plentiful you know. This writer is no Williamson farmer. Please deliver us from that plan. It is not what we need in Coffee by any means.

The crops of this immediate community are good, and are pretty well cleaned out. Generally speaking the out-look for big yields is fine enough.

Corn is nearly all "laid-by", but cultivation in the cotton crop will continue several weeks yet before it reaches the quitting stage.

The present cost of living should teach many farmers that they are not at home prudent as they really should be.

The revival meetings about the county are beginning, and sinners should repeat while the prayers last. We have much to be thankful for, can't we all pull a little for the glory of God?

The fiddler's convention to be held at Elba on the 20th will be well attended by our people. The old time melodies are being heard from all directions. Already the writer has demolished two bows. Too bad isn't it?

It is probable that a new telephone line will be erected from this community to Brookton sometime during this summer.

Mrs. A. A. Allen died at her home near this place early Sunday morning, having been ill for some time. Her affliction was pronounced pellagra.

She was a fine lady and a devout Christian. Her death was a great shock to the community. She is survived by a husband and several small children to whom we extend our sympathy.

Mr. Hugh Owens of Brookton, was in this section Tuesday on business, spending a few hours with the writer.

A summer term of the school at this place will be opened soon to be taught by Miss Glennie Bowe, of Elba.

Let's all pull for a glorious fourth. No danger of the comet now.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work.

The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that fails to cure. Send f.r. list of testimonials.

What A Summer Cold May Do.

A summer cold if neglected is just as apt to develop into bronchitis or pneumonia as at any other season. Do not neglect it. Take Foley's Honey and Tar promptly. It loosens the cough, soothens and heals the inflamed air passages, and expels the cold from the system.

The Wrong Way to Edu-
cate.

Is Mental wood-sawing useful?
Are the intellectual faculties of a
child strengthened by sheer drudgery?
Does brain-muscles in-
crease by dogged pegged pegging
away at a task that fails to excite
the slightest interest?

These questions, are not new,
but the judgment of Chicago's
school superintendent against
compound interest, compound
fractions are memorizing his-
torical dates in the elementary grades
naturally raises them afresh.

The conventional answer is that
the exercises named, while admitt-
edly useless in themselves, furnish
splendid mental discipline—
the harder and drier the task,
the more benefit a child derives
from mastering it. The pupil
will certainly soon forget how to
work compound fractions, for no
body ever does work compound
fractions, but he will have gained
much brain-muscle.

Is the mind of a child, we wonder,
very different from the mind of a man;
when intelligent
man over seeks mental improvement
in a task that does not interest him?
What adult, for example, will deliberately read an
absolutely uninteresting book?
The old-fashioned educational
theory was a sort of continual
driving of an unwilling horse to
water; and it is still suspected that
the impression that a given
task makes upon a child's mental
facilities is in proportion to the
effort that the child puts forth to
master it—easy come, easy go.
But every reading adult, we im-
agine, knows that the book to
which he drove himself with a
club was precisely the first one
these onions have sold for several
years at an average price of about
one cent a pound or \$200 for
the crop from an acre, that the
price net to the grower from the
commission men. From this the
cost of cultivation and planting,
watering, packing etc have to be
deducted. The cost of making
the crop is said to average \$80.00
an acre, the cost of the crates,
packing, hauling and water would
probably be at least \$80.00 or
more. This would leave the
grower \$80.00 an acre, which looks
big enough, but when one man
can only look after four or five
acres, the income does not sound
so very big. Bear in mind that
this is a case where a man makes
a SUCCESS of the business, there
are hundreds of men have and are
loosing money at the same business.
